WAPR0021

MORE POWER. MORE FUN. GUARANTEED.

THE ABT TOUAREG.

DISTINCTLY INCREASED DYNAMICS FOR THE LUXURY OFF-ROADER.

There is room for improvement even in the optically revamped new edition of the successful VW Touareg in matters of power and design: ABT Sportsline chip-tuning and turbocharger kit deliver up to 500hp to the wheels of this SUV. The specially tuned ABT suspension, the comfortable ABT Level Control (ALC) air suspension and the ABT brake system ensure that the on-road handling of this powerful vehicle is always a safe but pleasurable experience. And you can tell that this is the case just by looking at the ABT Touareg: in combination with the ABT 4-pipe exhaust system and AR wheels of up to 22 inch, the extravagant body-kit forms a design unit that gives the vehicle an extremely dynamic appearance - whatever angle it is viewed from.

ABT BR sports wheel.
Diamond-machined or high-gloss polished, with optional concealed valves, weight optimized and providing perfect handling.

ABT Front spoiler. Gives exclusive sportiness its distinctive character.

ABT AR sports wheel. Diamond-machined with exclusive finish. Optimized in weight, painted anthracite. A class of its own.

ABT rear skirt set. With chrome-plated 4-pipe rear muffler made of stainless steel.

ABT engine tuning. A real power package: ABT Power R, the perfect combination of chip tuning and compressor.

ABT ENGINE TECHNOLOGY

The requirement to bring out the best in every engine is part of ABT's family tradition. Whether the task in hand is chip tuning (**ABT POWER**), optimization of the engine electronics plus turbo charger (**ABT POWER S**) or compressor (**ABT POWER R**) – where performance upgrades are concerned we are in our element and clearly the world's number one for cars by the VW group. Thanks to the experience we have acquired in our many years of professional racing, we are aware that not only power is important, but also durability.

ABT AERODYNAMICS

If you rate extraordinary dynamics as high as individuality, then you have found the perfect pit crew in the ABT team. Our designers, engineers, technicians and model makers work hand in hand, and the result is definitely highly respectable: a tuning program developed by our company, from the front grill to the rear wing, which we can use to transform your series production vehicle into an impressive character performer.

ABT EXHAUST TECHNOLOGY

Impressive power is turned into optical and acoustical enjoyment: Thanks to extensive development work and double-walled stainless steel design, ABT exhaust systems and rear mufflers always put on an impeccable performance.

ABT SUSPENSIONS

It is only the right suspension that makes higher engine power pure pleasure. Also in this field we bring our entire racing experience and hence absolute cutting-edge technology onto the road. ABT suspension springs lower the vehicle and provide for dynamic looks and more stable road holding. By means of the ABT Level Control (ALC) the air suspension of your car can be electronically lowered and the driving dynamics adjusts depending to your individual requirements – from sporty to especially comfortable.

ABT BRAKES

Driving in a sporty way is great fun but only if you know for sure that any time you want you can bring your car to an immediate standstill. ABT steel-flex brake lines are tested constantly under severe conditions and therefore provide this feeling of certainty. With an ideal pressure point, excellent regulable application and an optimal braking distance – but with significantly less fading, in other words: no decrease in braking power under long-term stress. Thus, ABT brake systems bring everything reliably to a standstill. Except, of course, your driving pleasure.

ABT SPORTS WHEELS

Elegant or dynamic, modern or classical, silver or titanium – but always professionally balanced down to the last detail as far as weight and handling are concerned – ABT sports wheels perfectly round off the individual performance of your car. After all, they clearly show at a glance that they conform with the highest of demands both on the road and on the racing track and that they do not only look good but also want to be driven.
